

MCA Proof of Concept Program

By teaming with DataSource Mobility you will receive:

- Expertise in healthcare mobility deployments
- Pre- and post-deployment technical support
- Best practices gained from 150+ customer trials
- A turnkey trial package requiring minimal time commitment from your team
- Definable strategies to measure success
- Data to support informed proven decision making
- Contracted high volume pricing at deployment

To get your trial started contact your Regional Sales Manager or DataSource Mobility at 931.266.4242

A thoughtful and well constructed Mobile Clinical Assistant (MCA) trial can mean the difference between a winning deployment and a project with limited adoption or disgruntled users. Our goal at DataSource Mobility is to assist you and your team in executing an MCA Proof of Concept Program with the proper analytical tools and processes to incorporate caregiver feedback, build consensus and determine the proper TCO/ROI modeling to provide the most useful information. Our proof of concept programs can give you the knowledge you need to make informed and proven decisions for your organization.

A successful trial will better prepare you to fully deploy your EMR/CPOE solution.

DataSource Mobility will work with you to ensure you have a seamless transition and a successful outcome.
